

# Somalia Rainfall Forecast

Food and Agriculture Organization of the United Nations

**Issued: 02 October 2018**

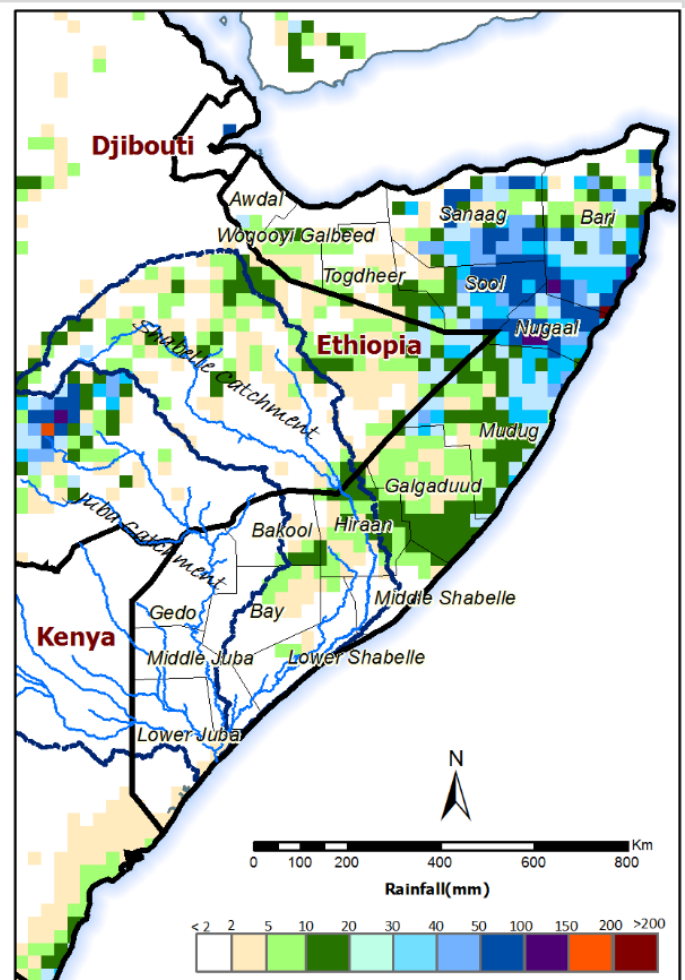

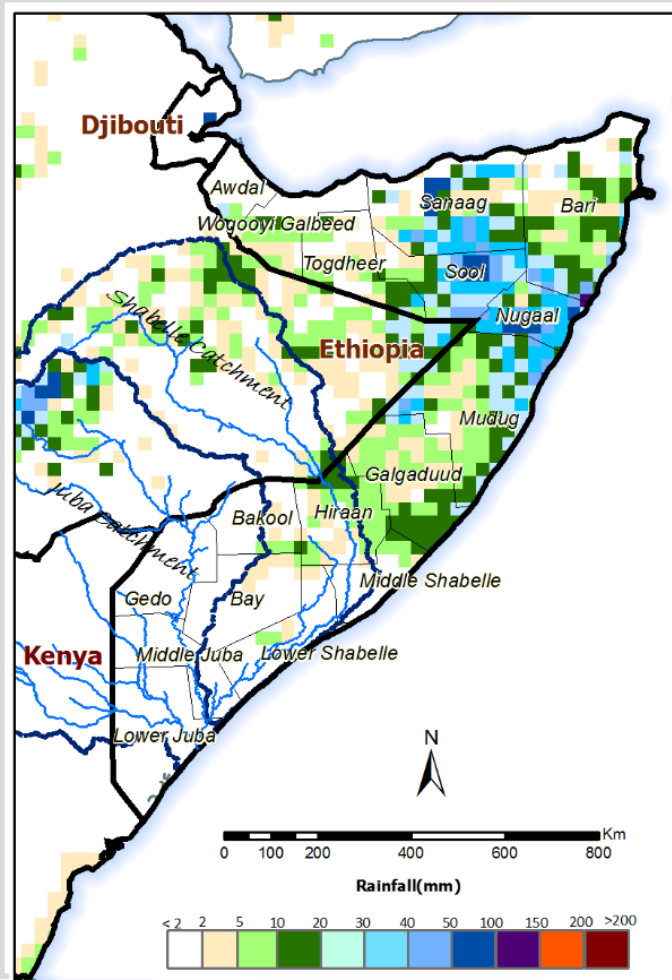

The north eastern parts of the country recorded good rains over the last few days with some stations in southern parts of Togdheer and Sool regions recording over 50mm of rainfall. The rains are expected to continue spreading further in the coming weeks until the end of season in November.

The rainfall forecast for the next three days (Map 1) is calling for moderate amounts of rainfall in most places of Puntland and central regions. The rains are expected to intensify in time and space during the week ending on 08 October 2018 as seen in Map 2. Moderate rains are also expected in the upper parts of the Ethiopian highlands during the coming week. Other areas will remain dry in the next one week with little or no rains.

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found on this link: <http://frrims.faoswalim.org>

**Map 1: 3-day cumulated rainfall forecast (02 to 04 October 2018)**

**Map 2: 7-day cumulated rainfall forecast (02 to 08 October 2018)**
