

Rainfall Forecast Somalia

Issued: 03/11/2015

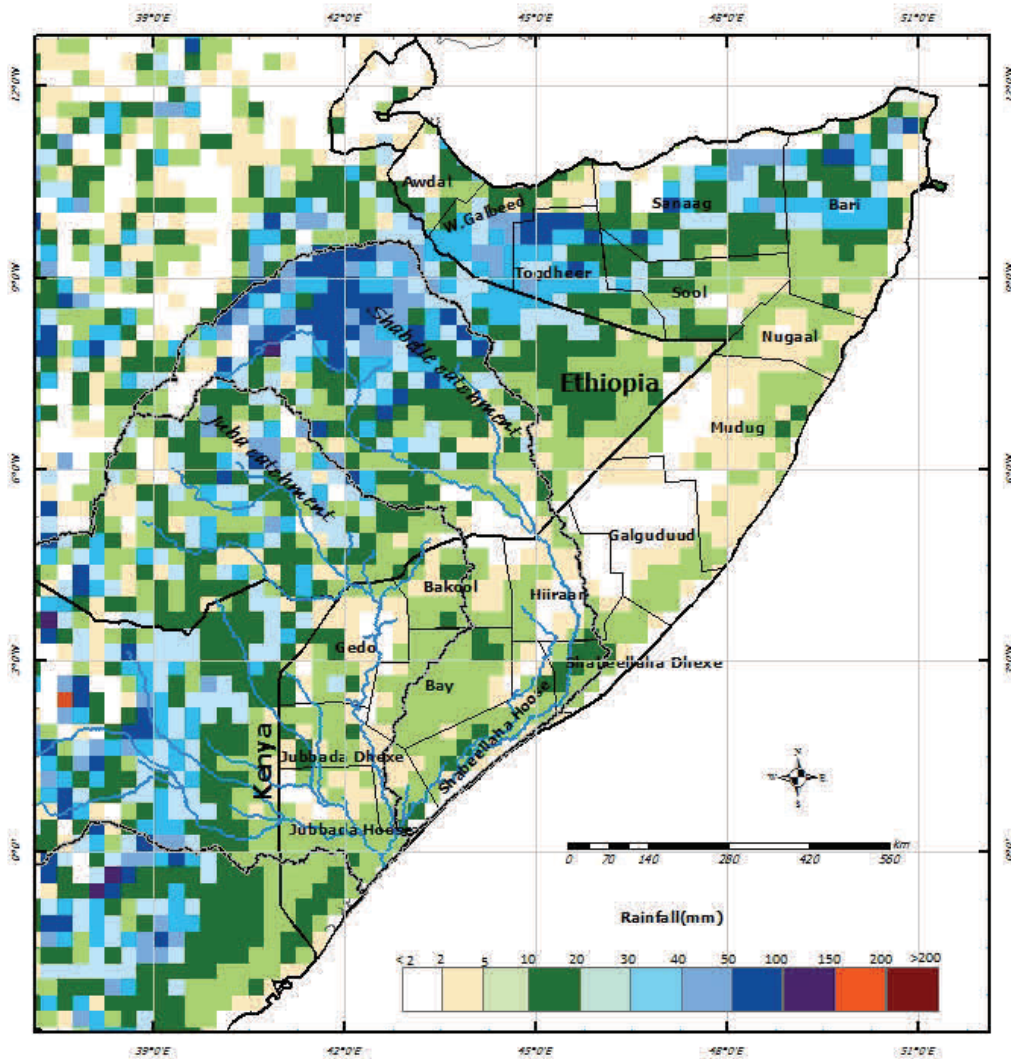

Saadaasha Roobka Soomaaliya

Soo Baxay: 03/11/2015

Light rains spread across many southern and central parts of Somalia are expected in the next three days. The northern parts of the country are expected to receive moderate rains over the same period, with few pockets in Togdheer and Bari regions experiencing high rainfall of up to 100mm which can lead to flash floods. The upper catchment of the Shabelle River in Ethiopia will receive high rains as well, which translates to increase in river levels later in the week.

3-day accumulated rainfall forecast (03/11/2015 to 05/11/2015)

Each cell on the map represents the forecasted accumulated rainfall over the next 3 days / *Xubin walba oo naqshadda koorkeeda ah waxay muujinaysaa guud ahaan saadaasha roobka ee saddexda maalmood ee soo socota*
