

Rainfall Forecast Somalia

Issued: 04/05/2016

Wet conditions are expected to persist across Somalia in the next three days. The northern regions of the country are expected to receive moderate to high rains, while in the central and southern regions the forecast points towards light to moderate rains.

The upper catchments of the Juba and Shabelle rivers are also expected to receive moderate to high rains within the same period. Given the forecast and the rising levels, there remains a **high** risk of flooding along the Middle and Lower Shabelle; while in Middle and Lower Juba the risk of flooding is remains **moderate**.

3-day accumulated rainfall forecast (04/05/2016 to 06/05/2016)

Each cell on the map represents the forecasted accumulated rainfall over the next 72 hours
