

# Rainfall Forecast Somalia

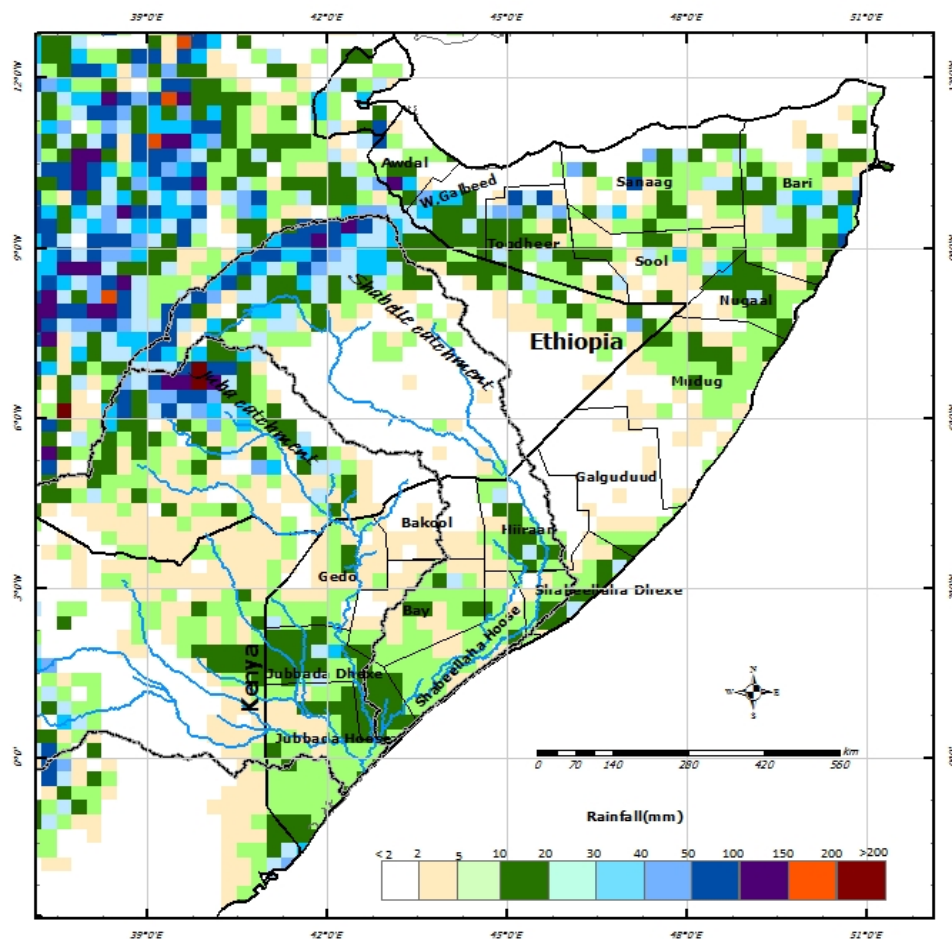

Issued: 09/05/2016

Heavy rains have been reported in parts Somalia over the last two days. Consequently, river levels have gone up with cases of river flooding in Gedo, Hiraan and Middle Shabelle regions in the south. Flash floods were also reported in parts of Puntland following the heavy rains.

The three days rainfall forecast calls for reduced rainfall activities in the country, however, some parts in Lower Juba and northern regions may experience moderate rains.

The river levels remain high in both Juba and Shabelle, with **high** risk of flooding along the Shabelle; while in Middle and Lower Juba the risk of flooding is **moderate**.

## 3-day accumulated rainfall forecast (09/05/2016 to 11/05/2016)

Each cell on the map represents the forecasted accumulated rainfall over the next 72 hours
