

Rainfall Forecast Somalia

Issued: 15/04/2016

The last week has seen moderate to heavy rains in some parts of Somaliland which came as a relief to the area that had been hard hit by a prolonged dry period. Some stations like Boroma, Gebilley and Dilla recorded over 100mm of cumulative rainfall in seven days. In Puntland, only parts of Bari region have recorded rains in the last few days while the central and southern parts of the country received minimal rains over the last one week. Moderate to heavy rains have also been reported in the Ethiopian highlands and this has consequently led to an increase in river levels in the upper reaches of Juba and Shabelle Rivers inside Somalia.

The three days rainfall forecast is calling for moderate rains in Most parts of Somaliland and the southern regions. Wet conditions are expected to persist in the Ethiopian highlands. Dry conditions are expected in Galgaduud, Mudug, Nugaal and Bari regions within the same period.

3-day accumulated rainfall forecast (15/042016 to 17/04/2016)

Each cell on the map represents the forecasted accumulated rainfall over the next 72 hours
