

Somalia Rainfall Forecast

Issued: 15 May 2017

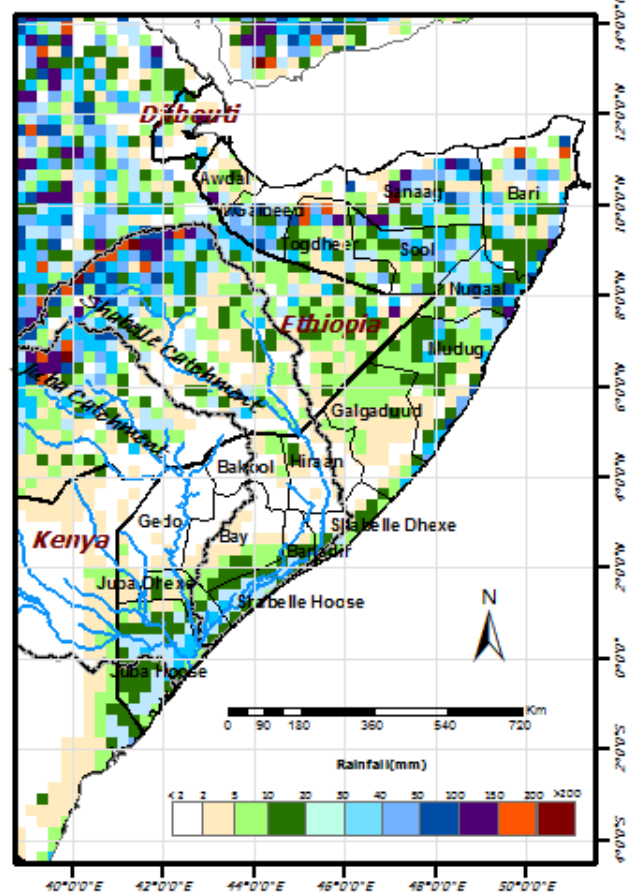

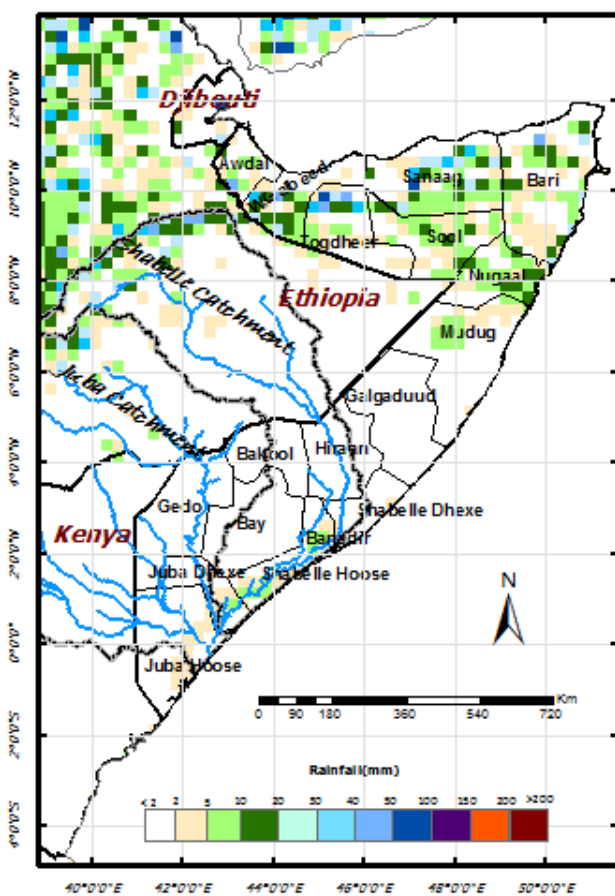

Light rains are expected to prevail for the next 3 days (Map 1) in a few places within Puntland and Somaliland as well as the coastal areas of southern regions in Somalia.

The cumulative rainfall forecast for the week which ends on 21 May 2017 (Map 2) shows light to moderate in parts of Somaliland, Puntland and coastal areas of southern Somalia including the Ethiopian highlands. Most of the rains are expected towards the end of the week. Other parts of the country will remain dry during the forecast period. The river levels are also expected to rise given the forecast.

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found in this link: <http://systems.fao.net/frims/>
