

# Rainfall Forecast Somalia

*Issued: 17/05/2016*

Light rains are expected in a few pockets of central and northern regions in Somalia in the coming three days. The rest of the country is expected to remain dry within the same period.

There still remains a **high** risk of flooding along the Juba and Shabelle Rivers owing to the high river levels and existing open and weak river banks.

**3-day accumulated rainfall forecast (17/05/2016 to 19/05/2016)**

Each cell on the map represents the forecasted accumulated rainfall over the next 72 hours
