

Rainfall Forecast Somalia

Issued: 24/03/2015

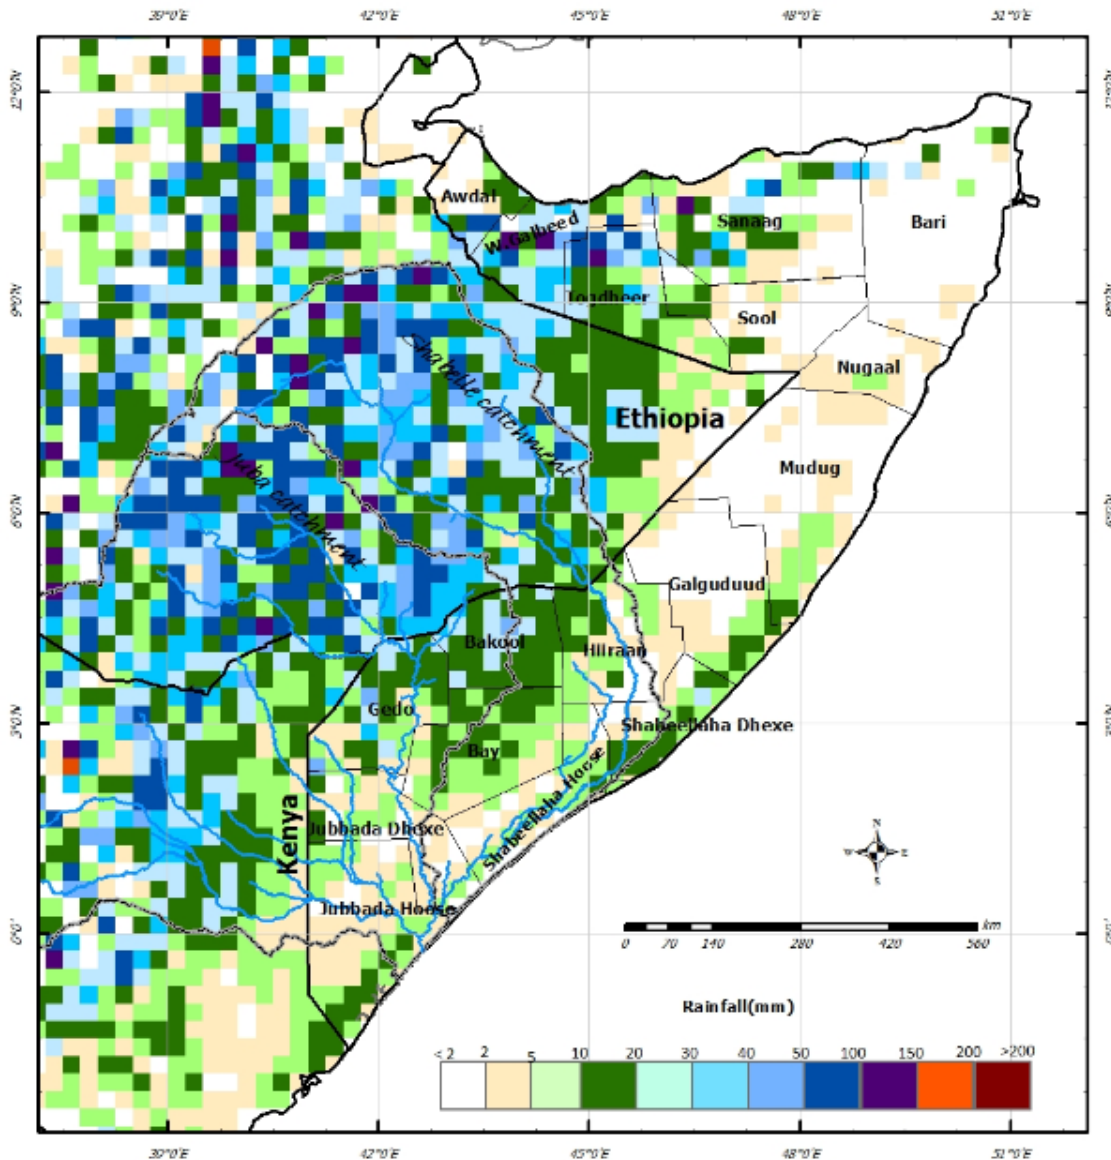

Saadaasha Roobka Soomaaliya

Soo Baxay: 24/03/2015

Moderate to heavy rains are expected to continue in the next three days within the north western parts of Somalia. The upper parts of Juba and Shabelle River basins within the Ethiopian highlands, whose rainfall contribute significantly to the river flow inside Somalia, may also record moderate to heavy rains during the same period. There will be a reduction of rainfall activities during the forecast period within Bari, and Sool, Nugaal, Mudug and Galgaduud regions. Other places including the Southern regions are expected to record light to moderate rains.

3-day accumulated rainfall forecast (24/03/2015 to 26/03/2015)

Each cell on the map represents the forecasted accumulated rainfall over the next 3 days / *Xubin walba oo naqshadda koor-keeda ah waxay muujinaysaa guud ahaan saadaasha roobka ee saddexda maalmood ee soo socota*
