

Somalia Rainfall Forecast

Issued: 30 October 2017

Light to moderate rains continued in some places across the country with the southern regions recording relatively good rains in many places.

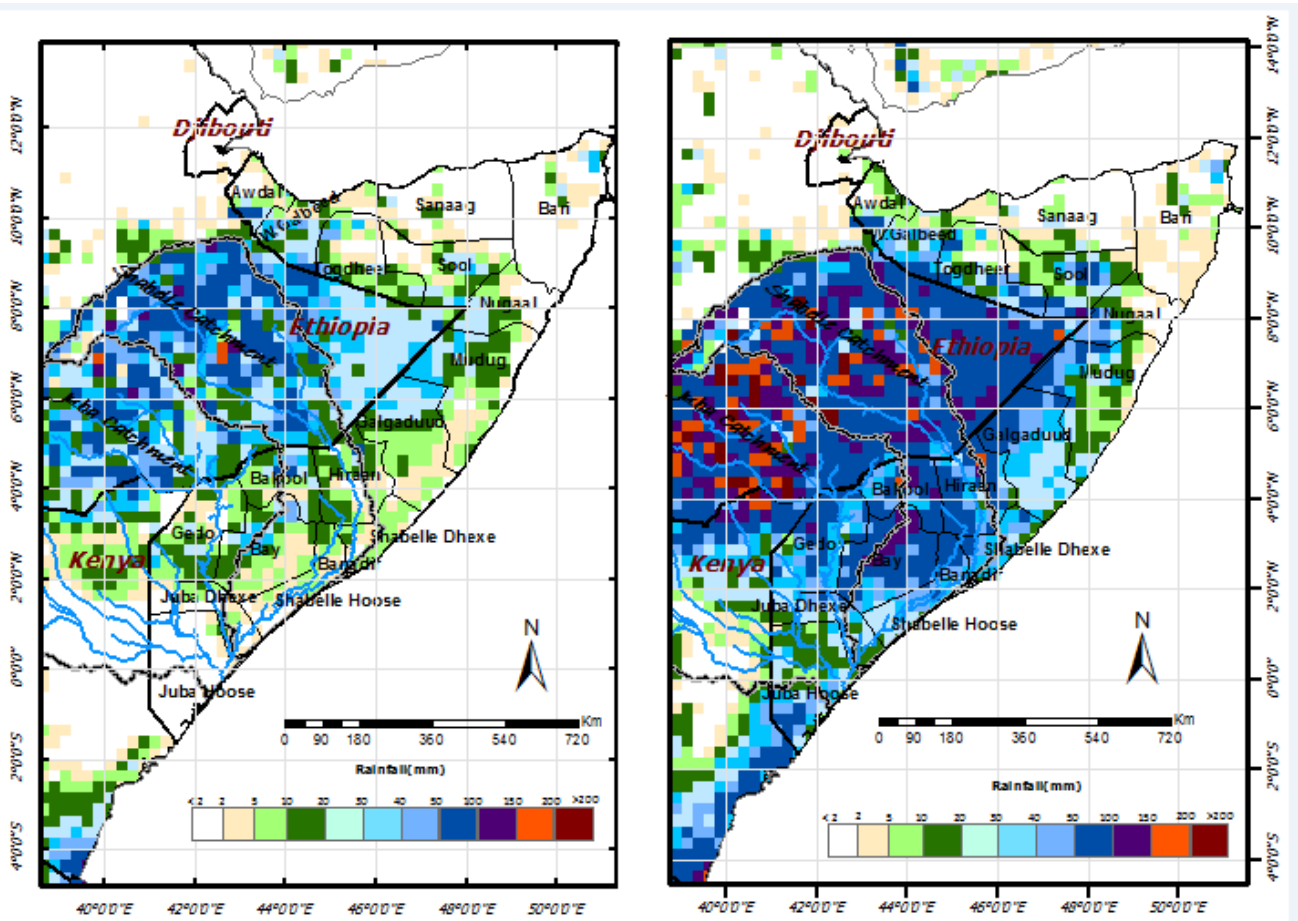

Heavy rains are foreseen in the coming week (Map 2) in South and central regions of Somalia. The Ethiopian highlands are also expected to get heavy rains within the forecast week.

Given the rainfall forecast, the river levels are expected to rise and causing moderate to high risk of flooding in Middle and lower reaches of Shabelle River towards the end of the week.

Users are advised that this is a forecast and at times there may be discrepancies between forecast and actual amounts of rainfall received. The forecast, observed river levels and rainfall amounts are updated on a daily basis and can be found on this link: <http://systems.faoso.net/frims/>

**Map 1: 3 days rainfall forecast
(30 Oct to 1 Nov 2017)**

**Map 2: 7-day cumulated rainfall forecast
(30 Oct to 5 Nov 2017)**
